

BOSTON COLLEGE HIGH SCHOOL MASTER PLAN

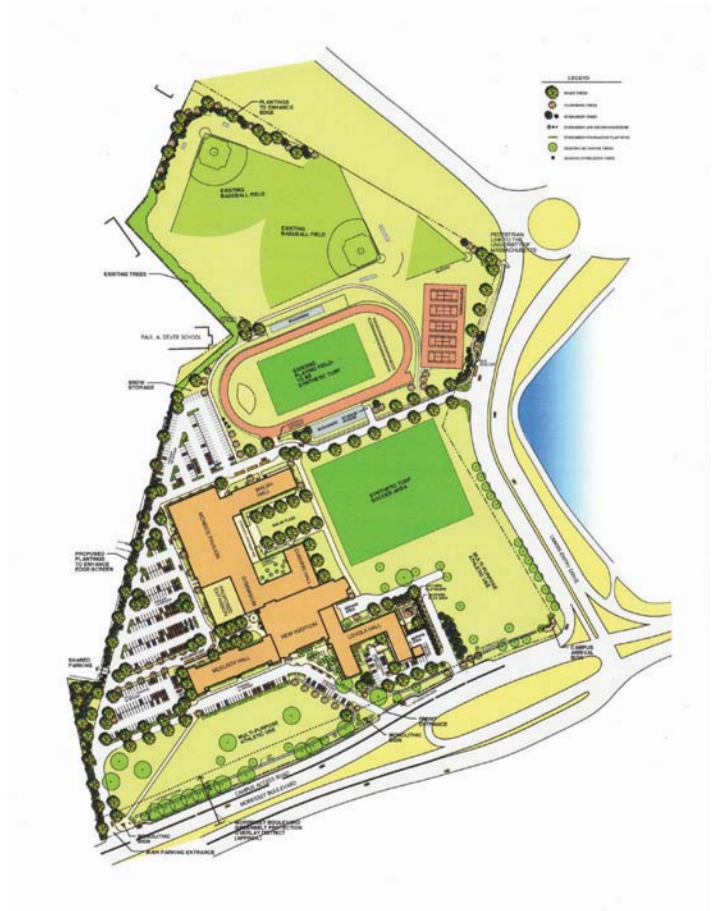

BOSTON, MA

CAMPUS MASTER PLANNING

As needs and priorities for a campus become established, specific budgets expand, and community interface and other new and varying demands on facilities are realized, change on campus is inevitable. However, throughout all the transitions, a constant thread of environmental sustainability is essential to insure that a rich and rewarding retreat for learning and growth, is established. The campus exists as a place where friendships are cultivated, memories are made and young lives are challenged and enriched. The objective of a Master Plan is to provide the format and template for campus use and growth leading many years into the future.

CAMPUS DESIGN INTENT

Paramount in the planning process at Boston College High School was to achieve a cohesive design character and create a physical environment that is aesthetic, functions well and is rewarding to experience. The intent was to provide the user with spontaneous cues regarding “sense of arrival”, “sense of place” and “sense of orientation”, achievable through implementing quality planning and design.
