

# VARIOUS PROJECTS

## SPECIAL FEATURES DESIGN

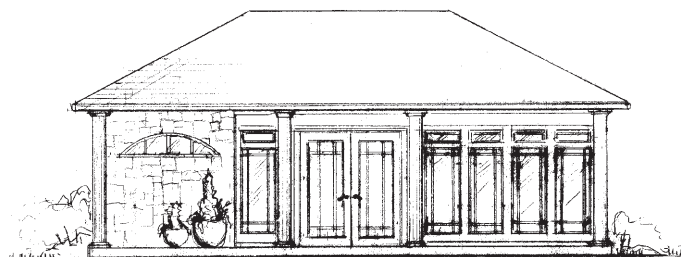

Landscape Design often requires special items to enhance the experience. Special site features that fall under the design purview of the landscape architect may vary from walls, patios, steps and decks to monumental stairs and grand centerpiece displays that may include fountains or public art such as metal or stone sculptures.

MKA is particularly adept at designing and construction detailing any site feature regardless of scale or material. We will creatively and artfully design with cast/cut or rough stone, wood, metal and numerous other materials for permanent landscape construction.
